

# Global warming fact or opinion

Greenhouse gases cause global warming

All power stations give out greenhouse gases

All cars produce greenhouse gases

Big powerful cars produce more greenhouse gases than compact cars

Nuclear energy does not create pollution

Nuclear power stations do not produce greenhouse gases

Coal fired power stations produce greenhouse gases

Oil fired power stations do not produce greenhouse gases

Gas fired power stations produce greenhouse gases

Wind farms are good for the environment

Water vapour is a greenhouse gas

Carbon dioxide is a greenhouse gas

# Global warming fact or opinion

Methane is a greenhouse gas

Humans can affect the amount of greenhouse gases in the atmosphere

Humans cannot control the amount of greenhouse gas in the atmosphere

It is too late to do anything about global warming

Global warming will produce a rise in sea levels

China produces more carbon dioxide in a year than the USA

The USA produces more carbon dioxide per person than any other large country

Wales produces more carbon dioxide per person than India

Less economically developed countries produce less carbon dioxide per year than developed countries
